PROFESSIONAL SUMMARY

Project Manager with 10 years in enterprise IT (SAP), managing up to 12 parallel projects and cross-functional teams of 5–20. Led end-to-end implementations with budgets of \$3M+. Stabilized failing workstreams: stopped contractual penalties and restored predictable delivery through structured governance (backlog, ownership, SLA tracking). Built and led SAP competence center from scratch (6–8 people), grew client accounts and secured 10+ new contracts. I develop and apply artificial intelligence tools to speed up task completion.

KEY SKILLS

Management: Cross-functional & parallel projects, end-to-end implementations (\$3M+), backlog management & prioritization, capacity planning, risk & issue management, dependency tracking, escalations, change control, delivery predictability, quality gates & acceptance criteria, stakeholder management, Waterfall, Agile (Scrum), Kanban, AI-assisted planning & analysis

Leadership: Teams of 5–20, hiring & onboarding, performance feedback, cross-functional coordination, conflict resolution, negotiation

Practice Building: Built SAP EHS competence center from scratch (6–8 people): staffing, mentoring, competency matrix & development paths, account growth

Commercial: Enterprise-level contracts, framework agreements, change requests, presales support, technical & commercial proposals

Tools & Domain: Jira, Taiga, Confluence, Trello, MS Project, Excel, PowerPoint | SAP (EHS, HCM), S/4HANA, Fiori/UI5

WORK EXPERIENCE

Vitte Consulting | *System Integration & Digital Transformation*

Jun 2022 – Present

Project Manager, Head of Process Automation (SAP EHS)

- Managed portfolio of up to 12 parallel projects for enterprise clients; cross-functional teams of 5–20.
- Led large end-to-end SAP implementation (\$3M+, peak team 20); controlled timeline, budget, and risks.
- Took over troubled workstream: stopped penalties, closed overdue items, restored predictable delivery through structured backlog, clear ownership, and SLA tracking.
- Built delivery governance in Taiga (workflow, statuses, owners, SLA tags, stream-based backlog) — shifted the team from reactive mode to planned, predictable output.
- Owned all client communication: kick-offs, weekly statuses, demos, scope & timeline alignment; resolved escalations, managed change requests.
- Won “Best Project Manager” (internal award); brought in 10+ new contracts through presales.

Unicon | *IT Consulting & Business Process Automation*

Apr 2017 – May 2022

Project Manager, Practice Lead (SAP EHS)

- Career progression: SAP Consultant - Senior Consultant - PM / Practice Lead.
- Built SAP EHS practice from scratch (6–8 people): staffing, mentoring, competency standards; grew client base.
- Ran 3–5 concurrent SAP implementation projects (budgets up to ~\$1.3M, several ~\$0.6M); teams of 5–10.
- Managed full-cycle delivery: requirements - solution design - build/configuration - testing - training - go-live - stabilization; controlled timeline/budget/risks.
- Aligned scope, timelines, and priorities with stakeholders; tracked budget and team capacity.

Bashneft-Inform | *IT Consulting & System Integration*

Jul 2014 – Mar 2017

Senior Consultant SAP

- Contributed to large SAP EHSM implementation: requirements gathering, task definition, technical documentation, system configuration, functional testing, and change coordination.

Datatech / NVision Group | *Earlier Roles*

Mar 2013 – Jul 2014

Junior Test Engineer / SAP Intern

- Functional/regression testing, test plans, Jira issue tracking; SAP user consulting, technical documentation.
